

STAR MINING INFRACON[®]
India Pvt. Ltd.

COMPANY PROFILE

www.starinfracon.com

An Indigenous Fast-Growing Giant in India

Star mining infracon India Pvt Ltd is an indigenous fast-growing giant in India, in the field of mining and energy, construction and industrial technology. Star mining infracon India Pvt Ltd has achieved unique identity in the field of energy, infrastructure, resources transportation, industrial digitalization, Iron, Coal Trading, mining & minerals. We have placed our company as the most trusted service provider for our high quality, time bound and cost-effective solution.

Star mining infracon India Pvt Ltd owns special distinctions of being the first to many unexplored business potentials in mining and energy, Construction with its comprehensive portfolio of varied products, legacy in smart modernization services and also superlative consulting and support under engineering and construction. Star mining infracon India Pvt Ltd has crafted original and authentic methodology for utilization of Energy and Construction emerging as the leader in energy solution and infrastructure development.

Mission

We strive to create sustainable growth in the power industry so that the country can thrive in future and develop to its maximum potential, for better living standards of the people.

Vision

We strive to create sustainable growth in the mining, construction, infrastructure & power industry so that the country can thrive in future and develop to its maximum potential, for better living standards of the people.

Value

We believe in high standards of workmanship regarding quality, commitment and teamwork to come up with the best in innovation and cutting-edge technology thus becoming the leaders in the industry.

BUSINESS SEGMENT

Star mining infracon India Pvt Ltd has emerged as a giant player in various businesses. Our integrated network of businesses contributes to the growth and development of our emerging economy.

ENERGY

POWER TRANSMISSION AND DISTRIBUTION

Star mining infracon India Pvt Ltd holds a leading position in the Power Transmission and Distribution industry. With more than a decade of experience we have excelled in all spheres of design, engineering, supply, civil, erection, testing & commissioning of over-head transmission line & substation, repairing and restoration of line works, etc.

OUTDOOR LIGHTING SOLUTION

Star mining infracon India Pvt Ltd provides every type of outdoor Lighting Poles. Our wide range of product includes High Mast Lighting Poles, Street Lighting Poles and Cast-Iron Decorative Poles. Our products are highly appreciated by our customers for their optimum quality, outstanding performance and our satisfactory service.

RENEWABLE ENERGY

As the depleting fossil fuel reserves and other sources of energy are at verge of exhaustion, also with alarming environmental concerns, renewable energy appears to be the long-term sustainable solution. Indian Govt. has set a target to install solar energy plants and wind power to compensate this shortage.

Star mining infracon Indian Pvt Ltd has embarked upon a mission of becoming a world leader in renewable power generation by being able supplying the maximum amount of energy requisite in the coming years.

INFRASTRUCTURE

Star mining infracon Indian Pvt Ltd Infrastructure sector concentrates in executing and delivering civil projects chiefly in rural and urban area to aid economic growth. We have designed and built diverse civil and structural engineering landmarks on diverse terrains that aids better lifestyle for million across. From roads, highways, ports, dam, airports, railway lines, bridges, culverts, to residential towers, institutions, IT buildings, hotels, hospitals we have worked towards public welfare development closely and contributed much in India's construction industry.

RESOURCES

India has had long struggling years in Resource industry. It has faced many challenges and ups-and-downs to be able to ensure a smooth supply of resources for the progressive development of the country. We have taken it upon us to overcome the short-comings and the challenges confronted commonly.

TRADING

COAL: Since 2015, we have shouldered upon us the responsibility to make good quality coal available to various units and thermal plants in India.

IRON: We are in the list of fastest growing iron ore lumps exporters in India. Our iron ore mineral is of very fine quality as we have business alliances with the top mining companies in India.

MINING AND MINERALS

Star Mining Infracon India Pvt Ltd. is among those few companies that offer exclusive turnkey solutions to maintain and providing mining service to companies across India.

We have the complete range of resource for all kind of operation which include from preparing, mining site to building up complete mill facilities, managing mine operation to extracting minerals on contract basis also carry out reclamation once mining cease for our clients.

TRANSPORTATION

Star Mining Infracon India Pvt Ltd the indigenous group is slowly penetrating into every field of infrastructural development to aid overall growth of the country. We are now also into transportation sector one of the largest and ever-expanding industry in India.

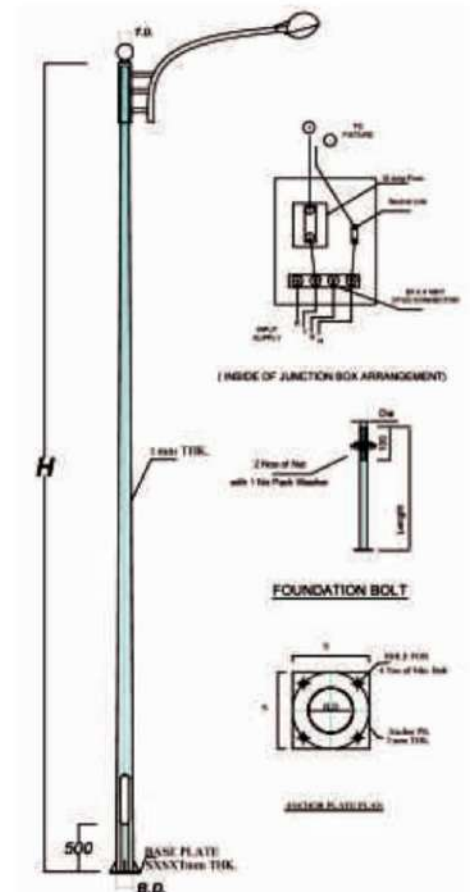

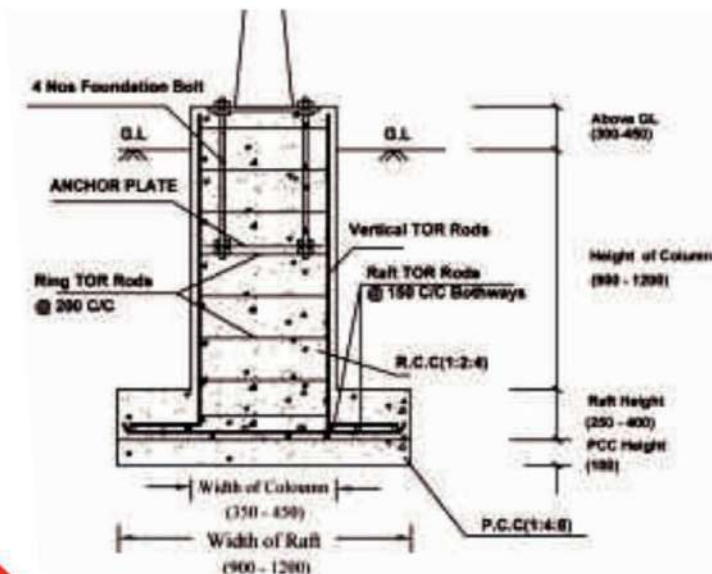

ROADWAY LIGHTING SOLUTIONS

Star mining infracon India Pvt Ltd offers a better selection of various poles for street, highway and neighborhood lighting applications because we believe that our society gain an important sense of safety when neighborhood and city roadways are well illuminated with street lights. We provide every type of best quality street lighting poles in the industry from leading manufacturers according to customers wanting and providing best service is our passion by which we have gained our goodwill by supply and installing of products in communities across India.

AN INTEGRATED STEEL SERVICE

Incepted in the year 2018, **STAR MINING INFRACON INDIA PRIVATE LIMITED** is an **ISO 9001: 2000** certified company engaged in trading and processing of industrial steel raw material. The company is well equipped with advanced manufacturing, processing and trading facilities that enable us to meet the requirements of domestic and international clients. We are engaged in offering hot rolled black coil & sheets, cold rolled closed annealed sheets, galvanized plain sheets, hot rolled black sheets, hot rolled skin pass sheets, hot rolled pickled -oiled coil & sheets, hot rolled skin pass coil & sheets, cold rolled closed annealed coils & sheets, galvanized plain coils & sheets & galvanized corrugated sheets, tin plate coils & sheets. moreover, we also provide cold rolled grain oriented & non grain oriented coil & sheets, hot rolled structural & chequered plates, metal structural's (angles, channels, beam, joists) and industrial metal components.

Industrial steel raw material offered by us are manufactured with utmost precision and are in accordance with international standards such as BSEN, ASTM and DIN. The entire range is appreciated for salient features of high tensile strength, robust construction, long lasting performance and corrosion resistance. Owing to these attributes, these find application in auto industry, appliances, construction, general engineering and drum barrel industries. We have also acquired a vast client base across the globe, including prominent companies such as E.C.E India Ltd. and Patni Systems,etc.

We have reached the pinnacle of success and carved a niche given in the below mentioned table. Equipped with state-of-the-art technology, and excellent infrastructure, we are able to offer hot rolled coils & sheets, hot rolled black coils & sheets, cold rolled closed annealed coils & sheets and galvanized plain coils & sheets as per the specifications of our clients. As an established steel processor and service provider, since 2018, we have a manufacturing unit with advanced production techniques.

PRODUCT PORTFOLIO

We are engaged in trading and processing of a wide range of industrial steel raw material that are used in auto industry, general engineering and construction industry. Our entire range complies with various international standards such as BSEN, ASTM and DIN. we cater to the requirements of our clients for Hot Rolled Black Coil & Sheets, Hot Rolled Pickled -Oiled Coil & Sheets, Hot Rolled Skin Pass Coil & Sheets, Cold Rolled Closed Annealed Coils & Sheets, Galvanized Plain Coils & Sheets & Galvanized Corrugated Sheets, Tin Plate Coils & Sheets.

In addition, we also provide Cold Rolled Grain Oriented & Non Grain Oriented Coil & Sheets, Hot Rolled Structural & Chequered Plates, Metal Structurals (Angles, Channels, Beam, Joists) and Industrial Metal components. These are appreciated for the following attributes:

High tensile strength.
Robust construction. Long
lasting performance.
Corrosion resistance.

STEEL PROCESSING

We are backed by highly advanced processing facility which enables us to meet the requirements of our valued clients. We primarily follow three different processes at our factory for manufacturing our range of industrial steel raw material. These processes are:

Slitting Line Process, and
Shearing Process.

INDUSTRIES CATER TO

Our world class industrial steel raw material meets the requirements of diverse industrial purposes. The Hot Rolled Coils & Sheets, Hot Rolled Black Coils & Sheets, Cold Rolled Closed Annealed Coils & Sheets and Galvanized Plain Coils & Sheets are widely appreciated by our domestic and international clientele. These are manufactured and processed under the supervision of industry experts who ensure their compliance with international quality standards. Owing to their high tensile strength, robust construction, long-lasting performance, our industrial steel raw material finds application in the following industries:

Auto industry. Appliances.

Construction.

General engineering.

Drum barrel industry.

We are committed to offer high quality industrial steel raw material to our clients. To ensure this, we test the raw material in our in-house physical and chemical laboratory. The finished products also undergo stringent quality in the laboratory, before being dispatched to the client's place.

Quality Compliance

We are an **ISO 9001: 2000** certified company engaged in trading and processing of industrial steel raw material. Our entire range is manufactured with utmost precision, using advanced technology. We ensure that only high grade raw material is utilized in the production process. For this, we have set up a state-of-the-art laboratory where these are tested. Even the finished products are thoroughly inspected as per industry recommended standards.

Industrial steel raw material offered by us is world class and meets various international standards such as BSEN, ASTM and DIN. We have drafted a quality policy which is monitored by a team of quality inspectors who ensure a quality assured range of industrial steel raw material, as per the specifications of our clients.

OUR CLIENTELE

With a rich industrial experience of more than 2 decades, we have acquired a vast client base in India and abroad. Our entire range of industrial steel raw material is manufactured in accordance with international quality standards and is highly preferred by our valued customers. We are known in the industry for our extensive marketing network and after sales services that ensure high levels of customer satisfaction. Some of our prominent clients who appreciate our products and services are:

Mahindra & Mahindra;
Patni Systems;
E.C.E India Ltd.; etc

These major companies source all types of industrial steel raw material such as Hot Rolled Coils & Sheets, Hot Rolled Black Coils & Sheets, Cold Rolled Closed Annealed Coils & Sheets and Galvanized Plain Coils & Sheets in large quantities, to meet their requirements.

MARKETING TEAM

The extensive product and service portfolio of **STAR MINING INFRACON INDIA PRIVATE LIMITED** makes it possible for us to reach out to multiple industry sectors for their steel products and processing needs.

We are able to successfully undertake all the steel processing works for industries like automobile manufacturers, civil and construction works, automatic controlled engineering, pipes and tubes, power and infrastructure, industrial components and metal assemblies, railroads and lots more.

We are proud to present a well diversified product and service portfolio in the field of steel processing and finishing. Some of our services include Slitting and Cut to Length, galvanized painting of cold rolled steel, pickling of hot rolled and cold rolled metal, flattening or thinning of steel plates etc.

STAR MINING INFRACON INDIA PRIVATE LIMITED is professionally led by professionals. They have been able to successfully manage the Company towards satisfying the customer needs, well within the decided turnaround times.

Our efficient marketing network expands to more than 20 states all across India, and we are strategically associated with the local suppliers and service providers as well. Therefore, we are able to closely identify the prospective clients, who are in need of getting their steel processing jobs done.

Our well trained executives will approach them with the aim of building long-term business relationships. They are fully equipped with all the product and service knowledge that is required for helping our prospects understand the benefits of partnering with us for their steel processing needs. We always make sure that our clientele receive their orders well within the given time frames anywhere across the country. We are able to achieve this kind of high deliverable standard by setting up Strong network in strategic locations all across India.

Our marketing division is always working relentlessly towards helping our customers making the right choices. They will competently guide them with each and every aspect that is needed to meet their steel processing specifications. Our company values are never compromised at any point of time.

Advantages Of Partnering With Us For Your Steel Processing Requirements

There will never be shortage of supplies, since we are tied up with some of the leading ISPs in the country.

Our Strong network ensure that you always receive your orders in time. We are linked with multiple local service providers for the finishing jobs.

By partnering with us, you will make sure that you are buying quality products and services for very competitive prices. Our dedicated and well qualified marketing division will make sure that your purchasing job becomes an enjoyable experience.

OUR VALUE

There are certain company values which will help us in reaching our vision. They are:

Developing credibility with the customers by giving them the best value for their money Relentless focus towards meeting the customer needs efficiently.

Ongoing process improvement plans and strategies Efficient teamwork and coordination High standard deliveries

Our company values are aimed at helping us create an ideal win-win situation with both our customers and our suppliers.

PROJECTS & OPERATIONS

STAR MINING INFRACON INDIA PRIVATE LIMITED is one of the best Independent Steel Service Centre in India, and we have been catering to our esteemed clients for now. We have been building a strong credibility in the market with absolute quality and timely deliveries.

Our company has developed a much diversified portfolio in the field of steel processing and finishing services like Cut to Length, Slitting, Cold Rolled and Hot Rolled pickling, galvanized painted cold rolled steel, flattened steel etc, in accordance to the specifications provided by our valued customers.

Our company is rated among the top Steel Service Centers in India that operates independently. Our services act as the perfect liaison between main metal producers who supply huge volumes of limited configurations and sizes, and the end customers who require customized steel products in small quantities.

We have been able to touch higher quality standards by adopting new cutting edge technologies and by developing our state of art infrastructure. Currently we have two steel service centers in India, which are in addition to numerous storage facilities that already available in many other states of India.

Our main service centers are located in Khopoli , and they are within just 50km from each other. These primary steel centers are located in the western part of Maharashtra, and it is just 70km away from the great city of Mumbai.

OUR INFRASTRUCTURE DEVELOPMENT PLAN

The proposed Cold Rolling Mill (CRM) facility of 120,000 TPA, and the Hot Rolled Pickled & Oiled (HRPO) facility of 150,000 TPA, is planned to be established at Unit khopoli facility respectively.

The infrastructure development plans of our company will enable us to handle a wider segment of clients from various different industry sectors.

VENTURING INTO INTERNATIONAL MARKETS

In order to venture into the international market through logistically beneficial sea ports, we have a plan form two wholly owned subsidiaries in UAE and Hong Kong, which will be used as a platform for expansion in these regions.

THE COMPANY

The Company aims to build a long term relation with its valued customers in Government and Private sectors. Provide exceptional quality materials to customers by pursuing business through innovation and advanced technology. The Company provides inputs and organizational infrastructure to raise quality levels across the construction industry Metal, Mineral Industry business by the government and private sector.

SAFETY POLICY

The Company is committed to the safety and health of our employees and all others who enter on to property where we work. Safety is our first priority before production before quality and certainly before profits. Our company do not intend anyone to take any safety shortcut to increase our profitability. Adherence to company safety standard and procedure is a condition of employment. Compliance with all aspects of our safety requirements.

SERVICES

ENGINEERING, PROCUREMENT & CONSTRUCTION (EPC)

Star Mining Infracon India Pvt Ltd launched its Engineering, Procurement and infrastructure construction (EPC) services in response to the growing demand of outsourcing services in power, water, wastewater, mining, oil and gas, telecommunications, smart cities, power delivery and renewable sector.

ENGINEERING, PROCUREMENT & CONSULTING

New Technologies and business models are pushing companies to radically change into digitally advanced, automated and customer first world. Our engineering and consulting service facilities revolutionary products and engineered transformation across all industries.

INSTALLATION & COMMISSIONING

A proper installation and commission will only ensure a high degree of practical operational reliability. Star Mining Infracon India Pvt Ltd have extensive experience of equipment installation and commissioning projects.

MAINTENANCE

Maintenance is an exclusive service offered by Star Mining Infracon India Pvt Ltd. where we adopt preventive maintenance measure to decrease the risk of equipment failures and unscheduled repairs.

Raise Boring & Raise Excavation

Ground drilling aims at the development of a new technology based on the technique for vertical shaft drilling in mixed-soft soil with a wide range of drilling diameters through a lining from composite materials whose properties are a significant advance in the world of materials.

Contract Mining Services

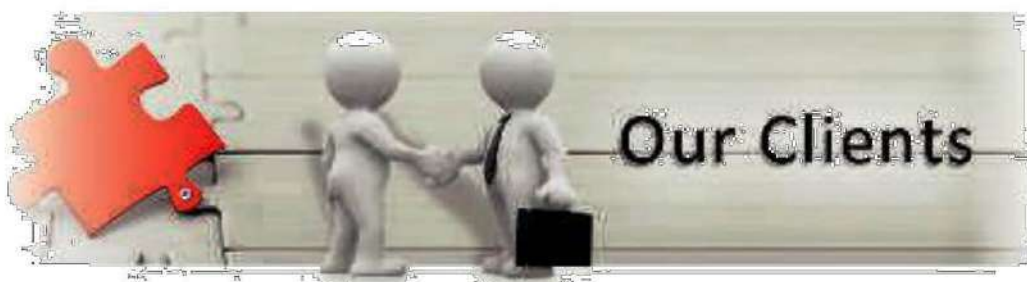

Star Mining Infracon India Pvt Ltd has a long history as a safe and efficient contract We provide all major companies here in India with our contract mining services and we are a dedicated, premium supplier of choice to the mining industry country wide. Our track record speaks volumes as does time expansive experience of all our people.

Conventional Contracting

Star Mining Infracon India Pvt Ltd offer a flexible contracting model which is open and convenient. All our offerings in terms of contracting and pricing models are designed in order to suit our customer's requirements as we fully understand the varied preferences of our spectrum of customers.

Mining EPC

Star Mining Infracon India Pvt Ltd EPC provides Engineering, Procurement and instruction solutions to the Power, Minerals & Metals and Water Desalination industries in Indian and some select global markets.

CORPORATE SOCIAL RESPONSIBILITY

We are all social being; and we aim to impart social benefits to the community as our CSR activity which are mainly charitable, philanthropic, and environmental voluntary activities. CSR has become a quite important facet of our company's hierarchy and has become integrated to the mission and vision of our company. We participate in both public and private sectors, for the ultimate development process that are complete, effective and fruitful. We take up social commitment seriously that has given birth to trust namely Paranuchal Janhit Forum under which we carry out dedicated service for the upliftment of our nearby communities. We allot a share of the profit purely to carry out these activities. Through this foundation, we take keen interest and devote our funds and services purely for helping the rural and other backward communities. Paranuchal Janhit Forum services have now become an integral part of company's vision and we pledge to develop these communities socially, economically and also otherwise to make them in par with the rest.
